

Molders Services Inc.

MSI is a domestic manufacturer of injection end components: screw tips, nozzles, barrels, screws, end caps and shut off nozzles.

30 Years of Experience

At MSI we combine 30 years of in plant diagnostics and troubleshooting in the plastics industry with 30 years of part manufacturing and design experience. The result is components which solve molding problems.

Universal Purge Compound

Deep-cleaning for your screw and barrel that restores your machine to original condition

Molders Services Inc. (MSI) has been designing and manufacturing for the injection molding industry for over 30 years. Whether you have a difficult problem which requires a specialty design or are looking for a long lasting replacement tip available to ship same day, MSI can address your needs and will guarantee the results.

We've seen a near endless number of methods and compounds used to purge barrels and clean screws efficiently. After years of careful consideration and research, MSI has selected a purge compound worthy of inclusion into our product lineup.

It's called Aquapurge, and while relatively unknown in the US market, we're confident you'll enjoy its superior performance and its very competitive price.

It uses a complete mechanical process for scrubbing residues while leaving the metal surfaces in an unworn state. This is achieved by correct selection of filler components; ensuring they are hard enough to breakdown the carbon deposits yet soft enough not to damage metal surfaces.

- Superior removal of carbon and baked-on material
- Outstanding performance in color / material changes
- Effective from 160°C (320°F) to 340°C (644°F)
- Excellent for cleaning screws and barrels to prep for inspections
- Contributes to better machine performance over time when used for every purge cycle

Molders Services can help you maximize your productivity!

At Molders Services we are experts in the identification of problems related to injection end components. We will come to your facility at no charge to identify any problems and guarantee the results. We will also work with you on a preventative/predictive maintenance program.
